

## **EMS, Inc Continues to Grow its 3D Printing Sales and Services.**

EMS, Inc a leading provider of 3D printing and 3D Scanning products and services is proud to announce the addition of a 3D Systems ProJet 7000 SLA (Stereolithography) 3D Printer to its 3D printing and prototyping equipment portfolio.

SLA has long been known for offering the highest resolution, highest accuracy, best surface finish and largest build sizes over any other 3D printing and rapid prototyping technology. The ProJet 7000 SLA 3D Printer is what is considered a “cross over” 3D Printer because it bridges the gap between a large production SLA machine and an office friendly 3D Printer like 3D Systems ProJet 3500 series.

With a 15” x 15” x 10” build chamber the ProJet 7000 offers the ability to build large parts in a range of materials and properties to include high impact, high strength, clear, flexible and much more. According to EMS, Inc President Mark Kemper, “the addition of the ProJet 7000 does two things to help EMS to continue its strong growth path. First it gives us a very fast, high resolution large format 3D Printer for our services business and secondly allows EMS to sell 3D Systems entire product lineup. 3D Systems offers everything from table top affordable 3D printers to very high tech metal sintering machines.”

With record sales in 2013 EMS, Inc is now a premier 3D Systems reseller selling 3D Systems production line of 3D printers which include SLA, (Stereolithography), SLS (Selective Laser Sintering) and DMLS (Direct Metal Laser Sintering). This complements EMS already selling 3D Systems entire Professional line of 3D printers which includes MJM (Multi-Jet Modeling) and ColorJet (Full 24 bit Color 3D Printing).

### **About EMS**

Since 2001 EMS, Inc has grown to become one of the premier providers of 3D scanning and 3D printing and products and services. For over 12 years EMS has helped thousands of clients across a variety of industries in product design and development, engineering and additive manufacturing.

EMS, Inc is based in Tampa, FL and has offices in Atlanta, GA and Auburn Hills, MI.
