

For Immediate Release:

3D Printing and 3D Scanning Solutions Leader EMS, Inc. Launches New Instant Quote System (IQS) for 3D Printed Parts and Materials

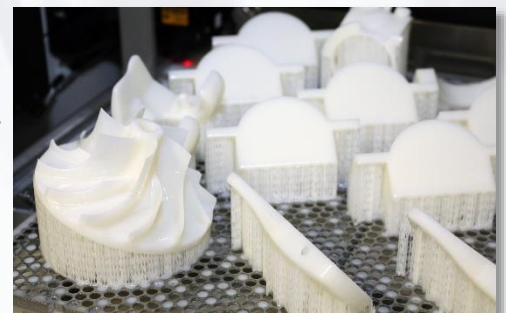

TAMPA, FL – March 29, 2016 – EMS (EMS, Inc., www.ems-usa.com), one of the largest single source providers of advanced 3D Scanning and 3D Printing solutions, announced the launch of its new online Instant Quote System (IQS™) for real-time 3D printed part quotes through www.ems-usa.com.

EMS’s new online quote engine (IQS) represents the culmination of 15 years of experience combined with EMS’s commitment to anticipate and meet evolving customer needs and expectations. Key features of EMS’s new IQS include:

- Access to instant real-time pricing across multiple 3D technologies such as SLA, MJP, FDM, 3DP and more
- Ability to get quotes or order product 24 hours a day, 7 days a week, 365 days a year
- New easy-to-use interface
- Advanced 3D model preview capability with interactive controls to rotate, zoom and pan
- Ability to edit, copy, save and email project quotes
- Access to quantity and multi-part discounts
- Quick turnaround – most orders ship within 3-5 business days
- Private label shipping –EMS can ship product directly to customers on your behalf.

“We are very excited about our new IQS capabilities,” stated Mark Kemper, CEO of EMS. “It’s been a long time in the making but we couldn’t be happier with the end result, and hope our customers enjoy the new features.” EMS’s new IQS can be accessed directly through the company’s new website. In addition to EMS’s new IQS, the website provides detailed information about EMS’s full range of 3D printing and 3D scanning solutions. The website also includes EMS’s new 3D Knowledge Center, which includes a wide variety of educational articles, white papers, ‘how to’ videos, product images and case studies.

For more information about EMS’ new website and the new Instant Quote System, go to www.ems-usa.com.

About EMS

Founded in 2001, EMS, Inc. is a leading single source provider of 3D Scanning and 3D Printing solutions to customers across a range of industries including aerospace, automotive, military, consumer products, medical and art. With over 15,000 projects completed and hundreds of systems sold, EMS has the equipment, experience and expertise to help clients streamline product development, inspection and reverse engineering through 3D technology.
