

For Immediate Release:

EMS and BAMA Members Meet with Governor Scott to Discuss Florida Engineering and Manufacturing Jobs

TAMPA, FL – July 1, 2016 – EMS (EMS, Inc., www.ems-usa.com), one of the leading single source providers of advanced 3D Scanning and 3D Printing solutions, recently met with Governor Scott to discuss the state of engineering and manufacturing jobs in Florida during a Bay Area Manufacturers Association (BAMA) roundtable discussion at Lockheed Martin headquarters in St. Petersburg.

The BAMA roundtable, which focused on growing skilled manufacturing businesses and engineering positions in the greater tri county area, is part Governor Scott's Florida First initiative to help Florida businesses grow, create jobs and diversify the state's economy. As a leading 3D technology provider headquartered in Florida, EMS's growth plans coincide with the state's growth initiatives. EMS has doubled in size during the past several years and plans to double again over the next five years.
