

For Immediate Release:

EMS Hosts Tour for Bay Area Manufacturing Association (BAMA)

TAMPA, FL – July 1, 2016 – EMS (EMS, Inc., www.ems-usa.com), one of the leading single source providers of advanced 3D Scanning and 3D Printing solutions, recently hosted the Bay Area Manufacturing Association (BAMA) at its Tampa headquarters.

While touring EMS, BAMA members saw the latest industrial 3D printers capable of 3D printing complex parts in variety of materials using a variety of 3D printing technologies and processes. EMS helped participants cut through the "hype" of 3D printing to discuss and demonstrate real world commercial and industrial applications such as prototyping, additive manufacturing, end use products, tooling aids, master patterns and more.

For over 15 years, EMS has been helping companies get to market faster with better products through the use of commercial 3D Printers and 3D Scanners. EMS is currently the largest integrated provider of both 3D scanning and 3D printing solutions to customers across the automotive, aerospace, military, consumer products, medical, art and entertainment industries.

With over 15,000 projects completed, EMS specializes in streamlining product development through advanced rapid prototyping, additive manufacturing, reverse engineering and inspection solutions. EMS is an authorized reseller of 3D Systems 3D, Creaform, SpaceClaim, Wenzel, GeoMagic, Surphaser, Steinbichler, API Sensor, Innovmetric and SolidWorks, and also provides 3D Printing and 3D Scanning Services to customers who prefer to outsource all or some of their prototyping, additive manufacturing, or inspection needs.
