

EMS Adds a Surphaser 100hsx to its 3D Scanning Arsenal

Tampa, Florida – October 27th, 2013

With already a very impressive arsenal of 3D Scanners, 3D Printers and related software, EMS has purchased Surphaser's new 100hsx 3D Scanner. The 100hsx builds on the legendary accuracy and resolution of the Surphaser 25hsx long range 3D scanner. The new scanner offers even higher accuracy and data quality in an impressive new package. New features include, smaller size, less weight, battery operation, on-board PC and remote control operation. The remote control operation allows the operator to control the 3D scanner from a smartphone, tablet or PC at a distance.

According to EMS, Inc President Mark Kemper, "We are very excited to be one of the first distributions to have a 100hsx for demonstrations and service projects". "Having already sold a few of the new 100hsx 3D Scanners to our customers we were convinced it was a worthy upgrade" continues Kemper.

Surphaser 100hsx 3D Scanner

EMS is one of the oldest and most respected distributors of Surphaser 3D scanners and related products. To arrange a demonstration or review a potential scanning project contact EMS, Inc at 877-845-2700.
