EMS Number One Reseller for Z Scanners and RapidFom in 2011

Engineering & Manufacturing Services, Inc (EMS), has retained its title as the number one reseller of 3D Systems Z Scanner (formally Z Corporation) hand-held 3D Scanners and for 2011 the number one reseller of RapidForm reverse engineering and inspection software.

"2011 was a record year for EMS" stated Mark Kemper, President & CEO of EMS, Inc. We grew our business at a record rate, added new engineers, moved to a larger headquarters and added other complimentary technologies", continues Kemper. "A major aspect of our success with the Z Scanner and RapidForm is our in-depth knowledge of both products. Customers don't just buy hardware and software they buy a solution to a problem. EMS is very good at helping customers solve these problems because of years of experience with 3D Scanning, 3D printing, reverse engineering and inspection in real world applications."

EMS's new Z Scanner and RapidForm customers participate in a wide range of industries including power generation, defense, aerospace, automotive, forensics, medical, oil & gas and more. With more than 30 years' experience in design, engineering and manufacturing, EMS helps customers in every imaginable industry with in-depth, on-site custom training with each new sale.

EMS is continuing its strong growth in 2012 with new 3D scanners from Steinbichler, and a whole new line of ProJet 3D printers from 3D systems as well as providing rapid prototyping, 3D Printing and 3D scanning services.
