**SPECIAL EVENT**

*Hosted by EMS & DASI Solutions*

## **Reverse Engineering, Inspection & AM Tech Open House**

**3D Scanning - 3D Printing - 3D Design Software - CT Scanning**

**When: 9 AM - 4 PM, May 25th**

**Where: DASI Solutions Office, 31 Oakland, Pontiac, MI 48342**

**FREE**

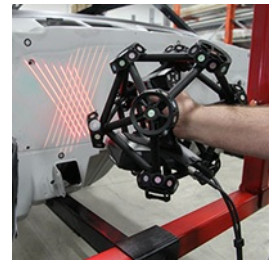

Join [EMS](#) and [DASI Solutions](#) for a special one day Tech Open House event featuring the latest in reverse engineering, inspection and product design technology and software from EMS, DASI Solutions, [LaserDesign](#), [3D Infotech](#) and [Wenzel](#).

The event is free, but registration is required to help us plan refreshments. [Register to attend here](#).

Stop in to watch demos and learn about advances in 3D scanning, 3D printing, CT scanning and 3D design software. Technology areas will be set up as stations so you can pick and choose what interests you. Also, breakout sessions at 11:00am and 1:30pm will focus on the benefits of using Geomagic for SolidWorks.

### **3D Scanning**

- Creaform MetraSCAN and/or HandSCAN demos
- Reverse engineering & inspection applications
- Wide range of 3D scanning technologies
- Microscopic to very large objects

### **3D Printing**

- 3D printing demos prototyping and functional parts
- Variety of materials
- Quick turn around - reduce development time

### **CyberGage360**

- One-button automation for 3D scan inspection
- Unprecedented speed & accuracy
- 3D volumetric part scans & inspection reports in <3 minutes
- No part fixture required

### **3D Infotech Universal Automation® Solutions**

- Fully automated 3D scanning control

- Demo featuring Streamline software and Creaform HandySCAN
- Software coordinates seamlessly across all hardware and software

### ExaCT CT Scanner Demo

- Scan parts completely inside and out
- Quickly measure and section data
- Scan different materials at one time

Join us Thursday, May 25th. [Register to attend here](#). The event is absolutely free.

### About **EMS**

Founded in 2001, EMS Inc. is a leading single source provider of 3D scanning and 3D printing solutions to customers across the automotive, aerospace, military, consumer products, medical, art and entertainment industries. With over 15,000 projects completed in 15 years, EMS specializes in streamlining product development through advanced rapid prototyping, additive manufacturing, reverse engineering and inspection solutions. EMS is an authorized reseller of [3D Systems](#), [Creaform](#), [SpaceClaim](#), [Wenzel](#), [GeoMagic](#), [Zeiss](#), [Surphaser](#), [API Sensor](#), [Innovmetric](#) and [SolidWorks](#).
